

STENTYS Reports 26% Year-over-Year Growth in Nine-Month 2016 Revenues

- The number of stents implanted worldwide has exceeded 20,000
- Left main coronary artery clinical trial on track
- Sound cash position of €15.7m at September 30, 2016

PRINCETON, N.J. and PARIS - October 12, 2016 - STENTYS (FR0010949404 — STNT), a medical technology company commercializing the world's first and only Self-Apposing® coronary stent, today announces its revenue for the third quarter and first 9 months to September 30, 2016.

- **Change in third-quarter and nine-month revenue***

€ thousands	9 months			3 rd quarter		
	2016	2015	% change	2016	2015	% change
Revenues	5,337.9	4,221.6	+26.4%	1,693.5	1,615.6	+4.8%

* Data reviewed by the statutory auditors

Over the third quarter of 2016, STENTYS recorded revenues of €1.7 million, up 5% compared with the third quarter of 2015. This growth was more moderate than in previous quarters because of a negative base effect linked to an exceptional order won in the Middle East in 2015.

Over the first 9 months of 2016, revenues were up 26%, at €5.3 million.

- **More than 20,000 stents implanted worldwide**

Since it was first used in the feasibility study in 2007, more than 20,000 self-apposing stents have been inserted in patients around the world.

- **Good progress in the left main coronary artery clinical trial**

The TRUNC study, designed to evaluate Xposition S' efficacy in 200 patients suffering from left main coronary artery disease, is on track, with patient enrolment now ongoing in 17 European medical centers and due to be finalized in the summer of 2017, as planned.

- **A sound cash position**

At September 30, 2016, STENTYS had cash and equivalents totaling €15.7 million compared with €18.1 million at June 30, 2016.

Christophe Lottin, Chief Executive Officer of STENTYS, comments: "Despite a negative base effect, STENTYS has recorded an increase in quarterly sales, reflecting demand for the Xposition® range that meets a real need from interventional cardiologists. The changes undertaken over the third quarter having now been well integrated by our teams, I am confident that our revenues will continue to grow."

- **Upcoming events**

STENTYS will participate in the Actionaria investor fair on November 18 and 19, 2016 in Paris (Palais des Congrès, Porte Maillot)

About STENTYS

STENTYS is developing and commercializing innovative solutions for the treatment of patients with complex artery disease. STENTYS' Self-Apposing[®] drug-eluting stents are designed to adapt to vessels with ambiguous or fluctuating diameters in order to prevent the malapposition problems associated with conventional stents. The APPOSITION clinical trials in the treatment of acute myocardial infarction showed a very low one year mortality rate and a faster arterial healing compared to conventional stents. The company's product portfolio also includes MiStent SES[®], a coronary DES whose new drug delivery mechanism is designed to match vessel response, and is marketed through STENTYS' commercial network in Europe, the Middle East, Asia and Latin America.
