3 227 640	3 227 640	3 226 098

About Ecoslops:

Ecoslops has developed and implemented a unique technology to upgrade maritime transport oil residues (slops and sludge) into new fuels and light bitumen. The solution proposed by Ecoslops is based on a unique micro-refining industrial process that transforms these residues into commercial products that meet international standards. Ecoslops offers an economic and ecological solution to port infrastructure, waste collectors and ship-owners through its processing plants. The first industrial unit is based in Sines, Portugal's largest commercial port.

Ecoslops is listed on Alternext in Paris (ISIN: FR0011490648; ticker: ALESA) and is PEA PME eligible.
