

Information on total number of voting rights and shares composing the share capital as at May 31, 2017

Paris, June 1st, 2017: Pixium Vision (FR0011950641 - PIX), a company developing innovative bionic vision systems to allow patients who have lost their sight to lead more independent lives, announces the evolution of its share capital. The number of voting rights and shares composing its share capital as at May 31, 2017 is as follow:

Total voting rights	Total number of shares composing capital
Total real voting rights*: 13,337,004	13,364,710
Total theoretical voting rights **: 13,364,710	

* The actual (or net) voting rights correspond to the total number of voting rights exercisable at General Meetings. They are calculated based on the total number of voting rights attached to the total number of shares, less any shares without voting rights (treasury shares, etc.)

**Theoretical (or gross) voting rights include all voting rights attached to the shares (including those without voting rights).

ABOUT PIXIUM VISION

Pixium Vision's Mission is to create a world of bionic vision for those who have lost their sight, enabling them to regain partial visual perception and greater autonomy. Pixium Vision's bionic vision systems are associated with a surgical intervention as well as a rehabilitation period.

The company is developing two bionic retinal implant systems. IRIS®II, the company first bionic system, obtained CE mark in July 2016. In parallel, Pixium Vision has recently completed the pre-clinical study phases for PRIMA, a sub-retinal miniaturized wireless photovoltaic implant platform, and is planning to initiate first-in-human trials.

Pixium Vision collaborates closely with academic and research partners spanning across the prestigious Vision research institutions including the Institut de la Vision in Paris, the Hansen Experimental Physics Laboratory at Stanford University, and Moorfields Eye Hospital in London. The company is EN ISO 13485 certified.
