

No Magic Acquisition Completed: Dassault Systèmes Strengthens Foothold in Systems Engineering to Facilitate New Connected Experiences

- No Magic, a leader in model-based systems engineering, and modeling solutions for software architecture and business processes
- Aerospace & defense, transportation & mobility, high-tech industries can address all aspects of embedded systems design
- Combined solutions generalize systems engineering, expand industry standards for “Internet of Experiences”

VELIZY-VILLACOUBLAY — June 20, 2018 — [Dassault Systèmes](#) (Euronext Paris: #13065, DSY.PA) today announced the completion of the acquisition of [No Magic, Incorporated](#), a global solutions company focused on model-based systems engineering, architecture modeling for software, system of systems and enterprise business processes modeling. The signing was announced on October 25, 2017 and the closing of the transaction follows completion of customary conditions, including receipt of foreign investment approvals in the United States and in Lithuania. No Magic is headquartered in Allen, Texas and has offices in Lithuania and Thailand.

The acquisition of No Magic strengthens Dassault Systèmes’ industry solution experiences based on the 3DEXPERIENCE platform by generalizing systems engineering for developing the “Internet of Experiences” – the smart and autonomous experiences that are digitally connecting products, nature and life in the physical world.

Enterprise customers, small companies and professionals in the aerospace and defense (NASA/JPL, Boeing, Lockheed Martin), transportation and mobility (Ford, Renault, Honda, BMW, Nissan), and other industries (Sony, Panasonic, John Deere, GE Healthcare, Pfizer, J.P. Morgan, PayPal) rely on No Magic’s solutions including its core product, MagicDraw, part of the Cameo Suite, for business process, architecture, software and system modeling with teamwork support. They gain dynamic visual insight, mitigate enterprise risk, lower costs and eliminate operational pain points caused by complex business and IT systems having multiple technologies and standards.

While providing continuity for No Magic’s customers, Dassault Systèmes will empower No Magic’s solutions with its 3DEXPERIENCE platform, complementing and reinforcing CATIA applications. This will provide a “single source of truth” allowing any user within a company to implement continuous 3D digital processes and to address all lifecycle aspects of an experience, from requirements, system of systems architecture models, systems and sub-systems architecture to functional, conceptual, logical and physical 3D modeling simulations.

The 3DEXPERIENCE platform natively supports openness by providing the largest range of open standards and languages for systems engineering, such as STEP, Modelica, FMI, ReqIF or OSLC. The acquisition will enrich it with the adoption of industry standard models and languages such as UML-SysML, DoDAF, MODAF, UPDM, or UAF.

In the age of the Experience economy, all enterprises need to drastically and continuously adapt their business processes. To address this challenge, the acquisition will provide them access to highly dynamic solutions, from modeling to simulation to traceability analysis.

About Dassault Systèmes

Dassault Systèmes, the 3DEXPERIENCE Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 220,000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit www.3ds.com.

3DEXPERIENCE, the Compass logo and the 3DS logo, CATIA, SOLIDWORKS, ENOVIA, DELMIA, SIMULIA, GEOVIA, EXALEAD, 3D VIA, BIOVIA, NETVIBES and 3DEXCITE are registered trademarks of Dassault Systèmes or its subsidiaries in the US and/or other countries.
