About SpineGuard®

Founded in 2009 in France and the USA by Pierre Jérôme and Stéphane Bette, SpineGuard is an innovative company that designs, develops, and markets disposable medical devices intended to secure the placement of implants in the skeleton. SpineGuard's primary objective is to establish its proprietary real-time digital DSG® (Dynamic Surgical Guidance) technology as a standard of care worldwide, the next step being its integration into robotic platforms. PediGuard®, the first device embedding DSG®, was co-invented by Maurice Bourlion, Ph.D., Ciaran Bolger, M.D., Ph.D., and Alain Vanquaethem, Biomedical Engineer. It is the world's first and only handheld device capable of alerting surgeons to potential pedicular or vertebral breaches. Over 70,000 surgical procedures have been performed worldwide with DSG® enabled devices. Numerous studies published in peer-reviewed scientific journals have demonstrated the multiple benefits DSG® offers to patients, surgeons, surgical staff and hospitals. Building on these solid fundamentals, SpineGuard deploys its technology platform in a disruptive innovation: the « smart » pedicle screw launched late 2017 and is broadening the scope of applications in dental implantology and surgical robotics. SpineGuard has offices in San Francisco and Paris. For further information, visit www.spineguard.com.
