

A case report highlights the interest of a long-term treatment with ADV-7103 in dRTA

Paris, 5 April 2022 – 6.00 pm CEST – Advicenne (Euronext: ALDVI), a pharmaceutical company specializing in the development and commercialization of innovative treatments for those suffering from rare renal diseases, today announces a case report published in Journal of Nephrology about a child partly recovering from growth retardation resulting from the long-term control of her metabolic acidosis with ADV-7103.

This case report highlights the importance of both an early diagnosis of distal Renal Tubular Acidosis (dRTA) and an adequate treatment enabling the improved long-term control of metabolic acidosis with a favorable impact on patient's health. The patient was included in the European trial, ARENA-2 (NCT03644706), and treated for more than 5 years with ADV-7103. This case supports the interest of ADV-7103 in the treatment of dRTA and the long-term advantage of a bi-daily dosing compared to the usual management of this disease.

The scientific paper is referenced below:

[Boyer, O., Manso-Silvan, M.A., Joukoff, S. et al. Improved growth of a child with primary distal renal tubular acidosis after switching from a conventional alkalizing treatment to a new prolonged-release formulation containing potassium citrate and potassium bicarbonate: lessons for the clinical nephrologist. J Nephrol \(2022\).](#)

About Advicenne

Advicenne (Euronext: ALDVI) is a specialty pharmaceutical company founded in 2007, specializing in the development of innovative treatments in Nephrology. Its lead product SibnayaTM (ADV 7103) has received its Marketing Approval for distal renal tubular acidosis in EU and the UK. ADV 7103 is currently in late-stage development in cystinuria in Europe and in dRTA and cystinuria in the US and in Canada. Headquartered in Paris, Advicenne has been listed on the Euronext Paris stock exchange since 2017. **For additional information see:** <https://advicenne.com/>.
