Press release

# Sensorion Publishes Results of Extraordinary General Meeting Resolutions

**Montpellier, April 15, 2022 – Sensorion (FR0012596468 – ALSEN)** a pioneering clinical-stage biotechnology company which specializes in the development of novel therapies to restore, treat and prevent within the field of hearing loss disorders, announces today the results of resolutions presented at its Extraordinary General Meeting (EGM), held in-person, on April 14, 2022 and made them available on the dedicated section of its website.

All resolutions recommended by the Board and submitted to the Extraordinary General Meeting, held in-person on April 14, 2022 were adopted. 63% of the capital was present and represented.

The results of the votes on all proposed resolutions can be found on Sensorion's website (https://www.sensorion.com) in the Investors section under the General Meeting tab.

#### **About Sensorion**

Sensorion is a pioneering clinical-stage biotech company, which specializes in the development of novel therapies to restore, treat and prevent hearing loss disorders, a significant global unmet medical need. Sensorion has built a unique R&D technology platform to expand its understanding of the pathophysiology and etiology of inner ear related diseases, enabling it to select the best targets and modalities for drug candidates, and has a pipeline of small molecule and gene therapy-based programs.

Sensorion is assessing next steps to advance clinical development of SENS-401 for SSNHL and for cisplatin-induced ototoxicity. The Company is advancing, with partner Cochlear Limited, a study of SENS-401 in patients scheduled for cochlear implantation.

Sensorion has entered into a broad strategic collaboration with Institut Pasteur focused on the genetics of hearing. It has gene therapy programs aimed at correcting hereditary monogenic forms of deafness including deafness caused by a mutation of the gene encoding for Otoferlin, Usher Syndrome Type 1 related deafness and hearing loss related to mutation in GJB2 gene to potentially address important hearing loss segments in adults and children. The Company is also working on the identification of biomarkers to improve diagnosis of these underserved illnesses.
