

Press release

Sensorion to attend the American Society of Gene & Cell Therapy (ASGCT) and Gene Therapy Analytical Development conferences in May 2022

Montpellier, May 12, 2022 – Sensorion (FR0012596468 – ALSEN) a pioneering clinical-stage biotechnology company which specializes in the development of novel therapies to restore, treat and prevent within the field of hearing loss disorders, is pleased to announce the participation of Sensorion's management in two scientific conferences being held in May 2022.

Patrice Vidal, Sensorion's Group Leader – Technology & Innovation Platform, will present a poster entitled "**Adeno-Associated Vector Discovery Platform for Inner Ear Disorders**", on May 18, 2022, at the American Society of Gene and Cell Therapy's (ASGCT) 25th Annual Meeting, taking place on May 16-19, 2022. An abstract is accessible on the ASGCT website ([link to access the abstract](#)).

Date: Wednesday May 18, 2022

Presentation: 5:30 pm – 6:30 pm EDT (11:30 pm – 12:30 pm CEST)

Event: [American Society of Gene and Cell Therapy Annual Meeting \(ASGCT\)](#)

Christine Le Bec, Sensorion's Head of CMC Gene Therapy, will give a presentation, in-person, entitled "**Developing Functional Analytical Assays for the Characterisation of Dual AAVs**", on May 31, 2022, at the **Gene Therapy Analytical Development**, taking place on May 30 – June 1, 2022 in London, United Kingdom.

Date: Tuesday May 31, 2022

Presentation: 9:30 am – 10am EDT (2:30 pm – 3 pm UK Time)

Event: [Gene Therapy Analytical Development](#)

About Sensorion

Sensorion is a pioneering clinical-stage biotech company, which specializes in the development of novel therapies to restore, treat and prevent hearing loss disorders, a significant global unmet medical need.

Sensorion has built a unique R&D technology platform to expand its understanding of the pathophysiology and etiology of inner ear related diseases, enabling it to select the best targets and modalities for drug candidates. Its portfolio combines both small molecule programs and a preclinical portfolio of inner ear gene therapies.

Its clinical-stage portfolio includes one Phase 2 product: SENS-401 (Arazasetron) progressing in a planned Phase 2 Proof of Concept study of SENS-401 clinical study in Cisplatin-Induced Ototoxicity (CIO) and, with partner Cochlear Limited, a study of SENS-401 in patients scheduled for cochlear implantation.

Sensorion has entered into a broad strategic collaboration with Institut Pasteur focused on the genetics of hearing. It has two gene therapy programs aimed at correcting hereditary monogenic forms of deafness caused by a mutation of the gene encoding for Otoferlin, and hearing loss related to mutation in *GJB2* gene to potentially address important hearing loss segments in adults and children. The Company is also working on the identification of biomarkers to improve diagnosis of these underserved illnesses.
