

## Advicenne announces the extension of the intellectual property of its drug Sibnaya<sup>®</sup>

- *Supplementary certificates extend Sibnaya<sup>®</sup> protection to 2036 in several European countries*

**Paris, France, October 5, 2022 – 6.00PM (CET)** – Advicenne (Euronext Growth Paris ALDVI - FR0013296746), a specialty pharmaceutical company dedicated to developing and commercializing innovative treatments for those suffering from rare renal diseases, today announces the extension of the intellectual property of its drug Sibnaya<sup>®</sup> in several European countries.

Advicenne has been granted Supplementary Protection Certificates (SPCs) in three of the main European pharmaceutical markets, France, Spain, and Italy. These certificates allow a five-year extension of patent protection, until 2036, in the countries where granted.

**Maxime Laugier, Head of Chemistry, Manufacturing and Controls of Advicenne, highlights:** *“This significant strengthening of our intellectual property is excellent news for Advicenne, making it possible to extend the operating life of Sibnaya<sup>®</sup> in the countries where applicable. Beyond this protection, we have developed with our industrial partners, an important know-how around the industrial use of these patents. Mastering compression for the manufacture of small tablets as well as their coating require a prominent level of technological knowledge. These elements, as well as the deployment of a new primary packaging machine, allow to market a product with high added value and erect important barriers to entry for potential competitors.”*
