About Getlink

Getlink SE (Euronext Paris: GET) is, through its subsidiary Eurotunnel, the concessionaire of the Channel Tunnel infrastructure until 2086 and operates Truck and Passenger Shuttle services (cars and coaches) between

Folkestone (UK) and Calais (France). Since 31 December 2020 Eurotunnel has been developing the smart border so that the Tunnel remains the fastest, most reliable, easiest and most environmentally friendly way to cross the Channel. Since its inauguration in 1994, more than 481 million people and 99 million vehicles have travelled through the Channel Tunnel. This unique land link, which sees 25% of trade between the Continent and the United Kingdom, has become a vital link reinforced by the ElecLink electrical interconnector installed in the Tunnel, which helps to balance energy needs between France and the United Kingdom. Getlink complements its sustainable mobility services with its rail freight subsidiary Europorte. Committed to "low-carbon" services that control their impact on its environment (through its activities the Group avoids the equivalent of 2 million tonnes of CO₂ per year), Getlink has placed at the heart of its concerns the place given to people, nature and places.
