

Press release

Sensorion to Host a Symposium during ISJET's International Symposium on Inner Ear Therapeutics on April 30, 2023

Montpellier, April 24, 2022 – Sensorion (FR0012596468 – ALSEN) a pioneering clinical-stage biotechnology company which specializes in gene therapies in the ear, is pleased to announce it will host a symposium at the 3rd ISJET's International Symposium on Inner Ear Therapeutics, an event sponsored by Sensorion, taking place on April 28-30, 2023, in Marrakech, Morocco.

Members of Sensorion's management team will participate in-person in **ISJET's International Symposium on Inner Ear Therapeutics**, on April 30, 2023, in Marrakech, Morocco. The team will present Sensorion and its ongoing gene therapy programs, OTOF-GT, for the treatment of hearing loss caused by mutations of the gene encoding for otoferlin, and GJB2-GT, for the treatment of hearing loss caused by mutations in *GJB2* gene, from 9am to 9.45am GMT (5am – 5.45am EDT).

About Sensorion

Sensorion is a pioneering clinical-stage biotech company, which specializes in the development of gene therapies to restore hearing loss disorders, a significant global unmet medical need.

Sensorion has built a unique R&D technology platform to expand its understanding of the pathophysiology and etiology of inner ear related diseases, enabling it to select the best targets and mechanisms of action for drug candidates.

It has two gene therapy programs aimed at correcting hereditary monogenic forms of deafness, developed in the framework of its broad strategic collaboration focused on the genetics of hearing with the Institut Pasteur. OTOF-GT targets deafness caused by mutations of the gene encoding for otoferlin and GJB2-GT targets hearing loss related to mutations in *GJB2* gene to potentially address important hearing loss segments in adults and children. The Company is also working on the identification of biomarkers to improve diagnosis of these underserved illnesses.

Sensorion's portfolio also comprises clinical-stage small molecule programs for the treatment and prevention of hearing loss disorders.

Sensorion's clinical-stage portfolio includes one Phase 2 product: SENS-401 (Arazasetron) progressing in a planned Phase 2 proof of concept clinical study of SENS-401 in Cisplatin-Induced Ototoxicity (CIO) and, with partner Cochlear Limited, in a study of SENS-401 in patients scheduled for cochlear implantation. A Phase 2 study of SENS-401 was also completed in Sudden Sensorineural Hearing Loss (SSNHL) in January 2022.
