

Results of Aelis Farma Combined General Meeting of May 24, 2023

Bordeaux, May 25, 2023 – 6 p.m. CEST – Aelis Farma (ISIN: FR0014007ZB4 – Ticker: AELIS), a clinical-stage biopharmaceutical company specialized in the development of treatments for brain diseases, announces that all the resolutions recommended by the Board of directors were adopted by the Combined General Meeting of shareholders.

Aelis Farma held its combined general meeting of shareholders on May 24, 2023, which was chaired by Mr. Anders Gersel Pedersen, Chairman of the Board of directors.

With a quorum of 85%, the shareholders have adopted all the resolutions recommended by the Board of Directors, in particular the financial statements for the 2022 financial year, the compensation policy applicable to the Chairman, the Chief Executive Officer and the directors, as well as delegations granted to the Board of directors related to financial transactions.

Shareholders also approved the transfer of the registered office at 1 rue Lafaurie de Monbadon - 33000 Bordeaux (France).

Details on the vote results will be available on the Company's website.

About AELIS FARMA

Founded in Bordeaux in 2013, Aelis Farma is a biopharmaceutical company that is developing a new class of drugs, the Signaling Specific inhibitors of the CB₁ receptor of the endocannabinoid system (CB₁-SSi). CB₁-SSi have been developed by Aelis Farma based on the discovery of a new natural brain defense mechanism by the team led by Dr. Pier Vincenzo Piazza, the Company's CEO, when he was Director of the INSERM Magendie Neurocenter in Bordeaux. By reproducing this natural mechanism, CB₁-SSi appear to be capable of selectively inhibiting the disease-related activity of the CB₁ receptor without disrupting its normal physiological activity. They thus have significant potential for the treatment of numerous brain diseases.

Aelis Farma is developing two first-in-class clinical-stage drug candidates: AEF0117 for the treatment of disorders due to excessive cannabis use, currently in a phase 2b study in the United States; and AEF0217 for cognitive disorders, including those of Down Syndrome (Trisomy 21), currently in a phase 1/2 study in Spain. The Company also has a portfolio of innovative CB₁-SSi for the treatment of other disorders associated with a dysregulation of the activity of the CB₁ receptor.

Aelis Farma draws on the talents of more than 20 highly qualified employees.
