

## Sensorion Will Present At The European Society Of Gene & Cell Therapy (ESGCT) Conference

**Montpellier, October 18, 2023, 7.30am CET – Sensorion (FR0012596468 – ALSEN)** a pioneering clinical-stage biotechnology company which specializes in the development of novel therapies to restore, treat, and prevent within the field of hearing loss disorders, is pleased to announce its participation, in-person, in the **European Society of Gene & Cell Therapy (ESGCT)** conference, taking place on October 24-27, 2023, in Brussels, Belgium.

Laurent Désiré, PhD, Head of Preclinical Development, and Pierre Rambeau, PhD, Preclinical Scientist, will co-present the poster entitled **“Preclinical development of SENS-501 as a treatment for the autosomal recessive non-syndromic deafness 9 (DFNB9) using an adeno associated vector-based gene therapy”**, (P011).

The poster sessions will take place on October 25, 2023, from 5pm to 6.15pm CET (11am-12.15pm ET) and on October 26, from 8.30pm to 9.30pm CET (2.30pm-3.30pm ET).

### About Sensorion

Sensorion is a pioneering clinical-stage biotech company, which specializes in the development of novel therapies to restore, treat and prevent hearing loss disorders, a significant global unmet medical need. Sensorion has built a unique R&D technology platform to expand its understanding of the pathophysiology and etiology of inner ear related diseases, enabling it to select the best targets and mechanisms of action for drug candidates.

It has two gene therapy programs aimed at correcting hereditary monogenic forms of deafness, developed in the framework of its broad strategic collaboration focused on the genetics of hearing with the Institut Pasteur. SENS-501 (OTOF-GT) targets deafness caused by mutations of the gene encoding for otoferlin and GJB2-GT targets hearing loss related to mutations in *GJB2* gene to potentially address important hearing loss segments in adults and children. The Company is also working on the identification of biomarkers to improve diagnosis of these underserved illnesses.

Sensorion’s portfolio also comprises clinical-stage small molecule programs for the treatment and prevention of hearing loss disorders.

Sensorion’s clinical-stage portfolio includes one Phase 2 product: SENS-401 (Arazasetron) progressing in a planned Phase 2 proof of concept clinical study of SENS-401 in Cisplatin-Induced Ototoxicity (CIO) and, with partner Cochlear Limited, in a study of SENS-401 in patients scheduled for cochlear implantation. A Phase 2 study of SENS-401 was also completed in Sudden Sensorineural Hearing Loss (SSNHL) in January 2022.
