

## Sensorion announces its attendance at the 42<sup>nd</sup> Annual J.P. Morgan Healthcare Meeting in San Francisco

**Montpellier, November 23, 2023, 7.30am CET – Sensorion (FR0012596468 – ALSEN)** a pioneering clinical-stage biotechnology company, specialising in the development of novel therapies to restore, treat and prevent within the field of hearing loss disorders, is pleased to announce that its management team, including Chief Executive Officer Nawal Ouzren, will be attending the 42<sup>nd</sup> Annual J.P. Morgan Healthcare Meeting, taking place on January 08-11, 2024, in San Francisco, USA.

Sensorion will meet with potential partners and investors to address ongoing and future strategic developments within the company, including developments in its gene therapy and small molecule pipeline.

If you wish to book a meeting with Sensorion's management team, please contact us by email at [ir.contact@sensorion-pharma.com](mailto:ir.contact@sensorion-pharma.com).

### About Sensorion

Sensorion is a pioneering clinical-stage biotech company, which specializes in the development of novel therapies to restore, treat and prevent hearing loss disorders, a significant global unmet medical need. Sensorion has built a unique R&D technology platform to expand its understanding of the pathophysiology and etiology of inner ear related diseases, enabling it to select the best targets and mechanisms of action for drug candidates.

It has two gene therapy programs aimed at correcting hereditary monogenic forms of deafness, developed in the framework of its broad strategic collaboration focused on the genetics of hearing with the Institut Pasteur. SENS-501 (OTOF-GT) targets deafness caused by mutations of the gene encoding for otoferlin and GJB2-GT targets hearing loss related to mutations in *GJB2* gene to potentially address important hearing loss segments in adults and children. The Company is also working on the identification of biomarkers to improve diagnosis of these underserved illnesses.

Sensorion's portfolio also comprises clinical-stage small molecule programs for the treatment and prevention of hearing loss disorders.

Sensorion's clinical-stage portfolio includes one Phase 2 product: SENS-401 (Arazasetron) progressing in a planned Phase 2 proof of concept clinical study of SENS-401 in Cisplatin-Induced Ototoxicity (CIO) and, with partner Cochlear Limited, in a study of SENS-401 in patients scheduled for cochlear implantation. A Phase 2 study of SENS-401 was also completed in Sudden Sensorineural Hearing Loss (SSNHL) in January 2022.
