<b>Annual General Meeting</b>	Wednesday June 19, 2024
<b>2024 Half-Year Results</b>	Monday September 30, 2024

### About AFYREN

Founded in 2012 to address manufacturers' growing need to reduce the carbon footprint of their inputs and move towards more natural ingredients, AFYREN manufactures biobased products to replace petroleum-derived molecules. With its innovative, unique, and proprietary process, the French greentech company offers low-carbon, bio-based alternatives in the following sectors: human and animal nutrition, cosmetics, flavors and fragrances, and fine chemicals. By valorizing local, non-food biomass, AFYREN helps manufacturers offer more sustainable finished products while remaining competitive.

The company is pursuing an ambitious development plan to better serve its international customers. Its first plant, AFYREN NEOXY, a joint venture with Bpifrance's SPI fund, is located in France, primarily to serve the European market. In early 2023, AFYREN announced the launch of a factory project in Thailand, partnering with a world leader in the sugar industry. AFYREN is also expanding its presence on the American continent, in line with distribution agreements already signed.

By 2023, AFYREN employed more than 110 people in Lyon, Clermont-Ferrand & Carling Saint-Avoid; the company invests 20% of its budget in R&D every year.

AFYREN has been listed on Euronext Growth<sup>®</sup> in Paris since 2021 (ISIN code: FR0014005AC9, ticker: ALAFY).
