Blanquefort (France), February 6, 2024, at 08:00 am CET – Groupe Berkem, a leading player in bio-based chemistry (ISIN code: FR00140069V2 – Ticker: ALKEM), today announces its consolidated 2023 full-year revenue, as at December 31, 2023.

Olivier FAHY, Chairman and CEO of Groupe Berkem, stated: *"Despite a financial year marked by significant tensions in some of its historic markets, Groupe Berkem proved the resilience of its business model throughout the year. The investments in R&D, business development and acquisitions that we have initiated and intend to pursue, demonstrated their potential in 2023. This was particularly the case in our "Health, Beauty & Nutrition" business area, with the numerous product launches we carried out, and in our "Industry" business area, which is being structured to better address the growing needs of manufacturers for innovative biobased solutions capable of integrating conventional chemistry. As was the case for i.Bioceuticals and Biopress in 2023, the Givaudan industrial site whose acquisition we are announcing today should enable us to move into new growth markets and significantly increase our current production capacities. The coming year should therefore be marked by new investments aimed at ensuring the ramp-up of this new site, offering the Group a new development outlook and positioning it even more as a leader in plant chemistry for the benefit of all industries, in France and internationally."*

On October 26, 2023, Groupe Berkem announced the launch of Novaterm[®], its connected, boosted anti-termite solution. 2025 financial targets

As announced in today's press release on the acquisition of Givaudan's industrial site in Valencia², taking into account the investments that Groupe Berkem plans to make in its new production site, notably in capacity in order to ensure the gradual ramp-up of the site, and the additional operating and personnel costs generated by this external growth transaction, the profitability targets announced by the Group and revised on October 13, 2023³ must now be postponed. As a reminder, the Company was aiming for an EBITDA margin of around 25%, to be achieved by 2025. Groupe Berkem now expects to reach this target by 2027.

The Group also confirms its ambition to achieve revenue of at least €85 million by 2025.
