## **INNATE PHARMA ANNOUNCES FDA CLEARANCE OF THE IND FOR IPH4502, A NECTIN-4 ADC TO BE DEVELOPED IN SOLID TUMORS**

- ***IPH4502 is Innate's novel and differentiated topoisomerase I inhibitor antibody drug conjugate (ADC) targeting Nectin-4***

**Marseille, France, September 23, 7:00 AM CEST**

Innate Pharma SA (Euronext Paris: IPH; Nasdaq: IPHA) ("**Innate**" or the "**Company**") today announced that the U.S Food and Drug Administration (FDA) has cleared its investigational new drug (IND) application to initiate a Phase 1 clinical study of IPH4502, its novel and differentiated topoisomerase I inhibitor antibody drug conjugate (ADC) targeting Nectin-4 in solid tumors. Innate expects to initiate the Phase 1 study in the coming months.

The Phase 1, open-label, multi-center study, includes a Part 1 Dose Escalation and a Part 2 Dose Optimization, and will assess the safety, tolerability, and preliminary efficacy of IPH4502 as a single agent in advanced solid tumors known to express Nectin-4, including but not limited to urothelial carcinoma, non-small cell lung, breast, ovarian, gastric and colorectal cancers.

*"We are thrilled to advance the IPH4502 program, and the IND application acceptance is an important milestone for Innate, as this is our first ADC program to enter the clinic," said **Dr Sonia Quaratino, Chief Medical Officer of Innate Pharma.** "IPH4502 is a novel and differentiated Nectin-4 ADC that has the potential to provide a new therapeutic option for patients with a cancer expressing a wide range of Nectin-4. Through this Phase 1 study we aim to advance the research on our ADC technology for the benefit of patients."*

### **About IPH4502**

IPH4502 is a novel topoisomerase I inhibitor Antibody Drug Conjugate (ADC) conjugated to exatecan targeting Nectin-4.

Nectin-4 is a cell membrane adhesion protein overexpressed in several solid tumors, including urothelial, breast, esophageal, lung, ovarian, and pancreatic cancers, with limited expression in normal tissues.

In non-clinical models, IPH45 was well tolerated and shows anti-tumor efficacy *in vitro* and *in vivo*.

### **About Innate Pharma**

Innate Pharma S.A. is a global, clinical-stage biotechnology company developing immunotherapies for cancer patients. Its innovative approach aims to harness the innate immune system through therapeutic antibodies and its ANKET<sup>®</sup> (**A**ntibody-based **NK** cell **E**ngager **T**herapeutics) proprietary platform.

Innate's portfolio includes lead proprietary program lacutamab, developed in advanced form of cutaneous T cell lymphomas and peripheral T cell lymphomas, monalizumab developed with AstraZeneca in non-small cell lung cancer, as well as ANKET<sup>®</sup> multi-specific NK cell engagers to address multiple tumor types.
