

Aelis Farma announces its 2025 financial calendar

Bordeaux, February 17, 2025 – 6:00 pm CET – Aelis Farma (ISIN: FR0014007ZB4 – Ticker: AELIS), a clinical-stage biopharmaceutical company specializing in the development of treatments for brain and peripheral diseases involving the CB₁ receptor, today announces its indicative financial calendar for the financial year 2025.

Event	Date of release*
2024 Annual Results	Tuesday, April 1, 2025
Annual General Meeting	Tuesday, May 27, 2025
2025 Half-Year Results	Monday, September 22, 2025

() The press releases will be issued after the close of trading. Information may be subject to change.*

About AELIS FARMA

Founded in Bordeaux in 2013, Aelis Farma is a biopharmaceutical company that is developing a new class of drugs, the Signaling Specific inhibitors of the CB₁ receptor of the endocannabinoid system (CB₁-SSi). CB₁-SSi have been developed by Aelis Farma based on the discovery of a natural regulatory mechanism of CB₁ hyperactivity made by the team led by Dr Pier Vincenzo Piazza, the Company's CEO, when he was the director of the Neurocentre Magendie of INSERM in Bordeaux. By mimicking this natural mechanism, CB₁-SSi appear to selectively inhibit the disease-related activity of the CB₁ receptor without disrupting its normal physiological activity. CB₁-SSi have consequently the potential to provide new safe treatments for several brain and peripheral organ diseases.

Aelis Farma currently has two first-in-class clinical-stage drug candidates. AEF0117 for the treatment of cannabis use disorders (CUD), that has completed a Phase 2b study in the United States in CUD. AEF0217 for cognitive disorders, which has completed a Phase 1/2 study in Spain in young adults with Down syndrome (Trisomy 21). The clinical results obtained with these 2 molecules have confirmed the therapeutic activity of CB₁-SSi in humans. The Company also has a portfolio of new innovative CB₁-SSi for the treatment of other disorders associated with a dysregulation of the activity of the CB₁ receptor, including diseases involving peripheral organs, such as obesity and related metabolic conditions as well as fibrosis. The different drugs developed by the company belong to the same general pharmacological class, the CB₁-SSi, but have distinct functional effects allowing to target different types of dysregulations of the CB₁ receptor and guaranteeing that the different compounds are not substitutable one with the others.

Aelis Farma draws on the talents of more than 25 highly qualified employees.
