### About the debt-restructuring moratorium

Under Swiss law (the law applicable to GeNeuro SA), a debt moratorium, or stay of execution, is a preventive measure to bankruptcy proceedings. The purpose of this procedure is to enable a company in financial difficulty to restructure its debts with its creditors and find measures to improve its situation. The stay protects the Company from legal action by its creditors while it works with the "commissaire au sursis", an independent expert appointed by the judge to supervise the process, help draw up a draft composition agreement and validate possible recovery measures. This process may result in a recapitalization of the company, a restructuring of its debt or a sale of all or some of its assets, among other things, with the proviso that if this fails, the company may be forced into bankruptcy.

The aim of this procedure is to reach an agreement that will enable the Company to continue its operations while satisfying its creditors.
