WINAMP GROUP ANNOUNCES THE FILING OF A U.S. LAWSUIT AGAINST SUNO*Jamendo files a complaint before a U.S. federal court against Suno, Inc., a leading company specializing in generative artificial intelligence for music.*

Winamp Group SA (Euronext Growth Brussels and Paris: ALWIN) today announces that its subsidiary Jamendo SA has filed a complaint before a U.S. federal court in Massachusetts against Suno, Inc., a U.S. company specializing in generative artificial intelligence for music and recently valued at approximately USD 5.4 billion following its latest funding round.

This filing comes just days after the complaint filed against NVIDIA Corporation and represents a further step in the actions undertaken by Jamendo to protect its intellectual property rights and those of the artists it represents in the context of the use of musical content in the development of artificial intelligence technologies.

Filing of a Federal Complaint Against Suno

The complaint relates to the alleged unauthorized use of musical content and associated data operated by Jamendo in the development and operation of artificial intelligence technologies.

It includes claims for copyright infringement, breach of contract, unjust enrichment, as well as other causes of action available under U.S. law.

The copyright claims are brought pursuant to the U.S. Copyright Act and seek the remedies available under applicable law, including monetary damages and injunctive relief.

Under the U.S. Copyright Act, statutory damages may, in certain circumstances and subject to the applicable legal requirements, be awarded in amounts of up to USD 30,000 per infringed work, and up to USD 150,000 per infringed work in cases of willful infringement.

This proceeding is separate from the action brought against NVIDIA Corporation and concerns allegations specific to Suno, although both cases raise similar issues relating to the alleged unauthorized use of Jamendo-related content in the development of artificial intelligence technologies.

Continuing Efforts to Protect Artists' Rights

Jamendo believes that the issues raised by these proceedings extend beyond its own commercial interests and concern broader questions regarding the use of copyrighted works in the training and development of generative artificial intelligence systems.

Through these actions, Jamendo seeks to protect its own rights, the rights of the artists it represents, and the licensing frameworks that ensure creators are properly recognized and fairly compensated for the use of their works.

*"The filing of this complaint marks another important step in Jamendo's efforts to protect the rights of artists in an environment where artificial intelligence is transforming the music industry," said **Alexandre Saboundjian, Chief Executive Officer of Winamp Group**. "We believe that innovation and respect for intellectual property must go hand in hand to ensure a sustainable ecosystem for creators, rights holders and the companies developing tomorrow's technologies."*
