As anticipated, Index Multimedia continues refocussing its business on the high margin activities. So, the activity of the first financial half year shows good dynamics, allowing the sales coming up to € 21.7M.

Index Multimedia has been putting a lot of efforts into the development of new products, confirming now their strategic relevance. Thus, the monthly number of new **Tchatte.com** subscribers has increased significantly thanks to the success of the new SNS (Social Network Services) functionalities of the Index Multimedia's group flagship site, this platform constituting the base for the expansion of the business in the near future.

This good level of activity combined with restructuring measures already implemented, should allow Index Multimedia confirming the improvement of its operating performance.
