Commenting on the results, Chairman and CEO Christophe de Margerie said:

The Group reported adjusted net income of \$3.3 billion for the first quarter, solid results albeit slightly lower than last year. The impact of sharply lower European refining margins was limited thanks to the implementation of performance improvement plans by the segment.

Operational excellence and capital discipline are the cornerstones of our robust results. With the CLOV project expected to start up on schedule, the Group launched the Kaombo project in the first quarter in ultra-deep offshore Angola. Kaombo illustrates perfectly our commitments and ambitions by combining innovative engineering solutions and disciplined cost management to create a competitive project. Regarding exploration, several promising wells are in progress or about to start, notably in Brazil, the Kwanza basin in Angola, and deep-offshore Ivory Coast, following our recent discovery in the frontier San Pedro basin.

In all the segments, our teams are working to translate our announced cost reduction commitment into tangible targets and are ready to participate in making the company more efficient, while keeping safety and the environment as our highest priorities.

¹ TOTAL changed the presentation currency of the Group's Consolidated Financial Statements from the Euro to the US Dollar, effective January 1, 2014, to make its financial information more readable by better reflecting the performance of its activities, which are carried out mainly in US dollars. Comparative 2013 information has been restated (see Note 11 to the unaudited interim consolidated financial statements), including the interpretation of IFRIC 21 « Levies » applied retrospectively (see Note 11 to the unaudited interim consolidated financial statements).

² Definition of adjusted results on page 2 – euro amounts represent dollar amounts converted at the average €-\$ exchange rate for the period : 1.3696 \$/€ in the first quarter 2014, 1.3206 \$/€ in the first quarter 2013 and 1.3610 \$/€ in the fourth quarter 2013.

³ Group share.

⁴ The ex-dividend date will be September 23, 2014. Pending approval at the Annual Shareholders Meeting on May 16, 2014, the remaining 0.61 €/share dividend for 2013 will be paid June 5, 2014.

● Main events since the start of the first quarter 2014

- **Started gas and condensate production on Itau Phase 2 in Bolivia**
- **Launched the ultra-deep offshore Kaombo project in Angola**
- **Discovered oil on Ivory Coast deep-offshore block CI-514**
- **Acquired exploration permits for UK shale gas and Russian oil shale in the Bazhenov**
- **Completed the acquisition of an interest in the Elk and Antelope major gas discoveries in Papua-New Guinea**
- **Partial IPO of interest in Gaztransport & Technigaz (GTT)**
- **Closed the sale of the 15% interest Angola block 15/06**
- **Signed an LNG Cooperation Agreement to strengthen the existing partnership between Total and CNOOC**

⁵ Adjusted results are defined as income using replacement cost, adjusted for special items, excluding the impact of changes for fair value. Adjusted cash flow from operations is defined as cash flow from operations before changes in working capital at replacement cost; adjustment items are on page 13 and the inventory valuation effect is explained on page 10.

⁶ Including acquisitions.

⁷ Net investments = investments including acquisitions – asset sales – other transactions with minority interests.

● First quarter 2014 results

> Net operating income from business segments

In the first quarter 2014, the Brent price averaged 108.2 \$/b, a decrease of 4% compared to the first quarter 2013 and 1% compared to the fourth quarter 2013. The European refining margin indicator (ERMI) averaged 6.6 \$/t, compared to 26.9 \$/t in the first quarter 2013 and 10.1 \$/t in the fourth quarter 2013.

The effective tax rate⁸ for the business segments was 55.7% in the first quarter 2014 compared to 58.6% in the first quarter 2013.

Adjusted net operating income from the business segments was 3,699 M\$ in the first quarter 2014 compared to 4,026 M\$ in the first quarter 2013, a decrease of 8%. This decrease was mainly due to a decrease in the Upstream results in line with the decrease in Brent and to the lower contribution of the Refining & Chemicals and Marketing & Services segments, which were impacted by a much weaker environment in Europe.

> Net income (Group share)

Adjusted net income was 3,327 M\$ compared to 3,698 M\$ in the first quarter 2013, a decrease of 10%.

Adjusted net income excludes the after-tax inventory effect, the effect of changes in fair value and special items⁹:

- The after-tax inventory effect had a negative impact on net income of 137 M\$ in the first quarter 2014 and a negative impact of 68 M\$ in the first quarter 2013.
- Changes in fair value had a positive impact on net income of 21 M\$ in the first quarter 2014 compared to a positive impact of 1 M\$ in the first quarter 2013.
- Special items¹⁰ had a positive impact on net income of 124 M\$ in the first quarter 2014 including mainly the gain realized on the sale (partial IPO) of an interest in Gaztransport & Technigaz (GTT) and the impairment of the Shtokman project in Russia. Special items had a negative impact on net income in the first quarter 2013 of 1,683 M\$.

Net income (Group share) was 3,335 M\$ compared to 1,948 M\$ in the first quarter 2013.

The effective tax rate for the Group was 57.7% in the first quarter 2014 compared to 59.2% in the first quarter 2013.

On March 31, 2014, there were 2,278 million fully-diluted shares, compared to 2,269 million on March 31, 2013.

Adjusted fully-diluted earnings per share, based on 2,277 million fully-diluted weighted-average shares, was \$1.46 compared to \$1.63 in the first quarter 2013.

Expressed in euro, adjusted fully-diluted earnings per share decreased by 14% to €1.07.

⁸ Defined as: (tax on adjusted net operating income) / (adjusted net operating income - income from equity affiliates - dividends received from investments + tax on adjusted net operating income).

⁹ Detail shown on page 10.

¹⁰ Detail shown on page 13.

> Investments – divestments¹¹

Investments, excluding acquisitions and including changes in non-current loans, were 5.2 B\$ in the first quarter 2014 compared to 6.4 B\$ in the first quarter 2013, a decrease of 19%.

Acquisitions were 299 M\$ in the first quarter 2014, essentially comprised of the carry on the Utica gas and condensate field in the United States and the acquisition of marketing assets in Egypt.

Asset sales in the first quarter 2014 were 1,476 M\$, essentially comprised of the sale of Angola block 15/06 and the partial IPO of an interest in GTT.

Net investments¹² were 4.0 B\$ in the first quarter 2014 compared to 6.6 B\$ in the first quarter 2013.

> Cash flow

Cash flow from operations was 5,338 M\$ in the first quarter 2014, an increase of 9% compared to the first quarter 2013.

Adjusted cash flow from operations¹³ was 6,204 M\$, a decrease of 8% compared to the first quarter 2013.

The Group's net cash flow¹⁴ was 1,313 M\$ compared to negative 1,707 M\$ in the first quarter 2013, essentially due to a decrease in net investments between the two periods.

The net-debt-to-equity ratio was 23.5% on March 31, 2014, compared to 23.3% on December 31, 2013 and 25.9 % on March 31, 2013¹⁵.

¹¹ Detail shown on page 14.

¹² Net investments = investments including acquisitions and changes in non-current loans – asset sales – other transactions with minority interests.

¹³ Cash flow from operations at replacement cost before changes in working capital.

¹⁴ Net cash flow = cash flow from operations - net investments (including other transactions with minority interests).

• Liquids (kb/d)	1,031	1,142	1,193	-14%
• Gas (Mcf/d)	6,268	6,260	6,137	+2%

Hydrocarbon production was 2,179 thousand barrels of oil equivalent per day (kboe/d) in the first quarter 2014, a decrease of 6% compared to the first quarter 2013, essentially due to the following :

- +1% for start-ups and growth from new projects and a lower level of maintenance which more than offset the normal production decline,
- -5.5% for portfolio changes, essentially the expiration of the ADCO license in the United Arab Emirates and the sale of TOTAL's exploration and production assets in Trinidad & Tobago, partially offset by the increase in production related to the interest in Novatek,
- -1.5% for security issues in Libya and Nigeria.

Excluding the ADCO license, which expired in January 2014, hydrocarbon production in the first quarter 2014 decreased by 1% compared to the first quarter 2013 and increased slightly by 0.5% compared to the fourth quarter 2013.

Adjusted net operating income from the Upstream segment was 3,092 M\$ in the first quarter 2014 compared to 3,257 M\$ in the first quarter 2013, a decrease of 5%, reflecting essentially the lower average realized hydrocarbon prices between the two periods and a less favorable production mix, partially offset by a lower effective tax rate.

The effective tax rate for the Upstream segment was 59.5% compared to 62.7% in the first quarter 2013 which was particularly high due to non-deductible exploration charges.

The return on average capital employed (ROACE¹⁶) for the Upstream segment was 13% for the twelve months ended March 31, 2014, compared to 14% for the full-year 2013.

* includes share of TotalErg. Results for refineries in South Africa, French Antilles and Italy are reported in the Marketing & Services segment.

** based on distillation capacity at the beginning of the year.

The decrease in refinery throughput compared to the first quarter 2013 was essentially due to a turnaround at Grandpuits, some unplanned maintenance at Provence and Antwerp, and some voluntary shutdowns in response to weak refining margins in Europe. In the first quarter 2013, there was scheduled maintenance at Donges and a turnaround at Normandy for the modernization project.

** Hutchinson, Bostik, Atotech.

The ERMI averaged 6.6 \$/t over the quarter, a decrease of 75% compared to the first quarter 2013, in a very weak market for all refined products. Petrochemicals margins remained at high levels, particularly in the United States.

In this context, adjusted net operating income from the Refining & Chemicals segment was 346 M\$ in the first quarter 2014, a decrease of 21% compared to the first quarter 2013.

This decrease was essentially due to the strong deterioration of the European refining environment, partially offset by better petrochemical and refining margins in the United States, which benefited the Port Arthur integrated platform, improvements in Specialty chemicals, and the ongoing implementation of synergy and efficiency plans in line with the objectives announced for 2014.

The ROACE¹⁷ for the Refining & Chemicals segment was 9% for the twelve months ended March 31, 2014, stable compared to the full-year 2013.

Total Marketing & Services sales volumes	1,651	1,755	1,715	-4%

* excludes trading and bulk Refining sales, includes share of TotalErg.

In the first quarter 2014, sales decreased by 4% compared to the first quarter 2013, essentially due to a decrease in heating fuel and LPG sales in Europe that was linked to exceptionally mild winter weather this year versus the harsh winter in 2013. In contrast, gasoline sales by the retail network in Europe and Africa-Middle East increased between the two periods.

The Marketing & Services segment's sales were 26 B\$, down 5% compared to the first quarter 2013.

Adjusted net operating income from the Marketing & Services segment was 261 M\$ in the first quarter 2014, a decrease of 21% compared to the first quarter 2013, mainly due to the impact of weather on sales and lower margins in Europe, partially offset by better performance from Retail and Lubricants as well as improved results at New Energies.

The ROACE¹⁸ for the Marketing & Services segment, which includes New Energies, was 15% for the twelve months ended March 31, 2014, compared to 16% for the full-year 2013.

● Summary and outlook

The ROACE¹⁹ for the Group for the twelve months ended March 31, 2014, was 12%, compared to 13% for the full-year 2013.

Return on equity for the twelve months ended March 31, 2014, was 15%, stable compared to 2013.

Pending approval at the May 16, 2014 Annual Shareholders Meeting, TOTAL S.A. will pay the remainder of the 2013 dividend on June 5, 2014, of 0.61 €/share²⁰, an increase of 3.4%. The 2013 dividend represents a total of 2.38 €/share.

In addition, the Board of Directors decided on April 29, 2014, to pay a first quarter 2014 interim dividend of 0.61 €/share on September 26, 2014.²¹

In the Upstream, the next anticipated operated start-ups are the CLOV project in Angola at the end of June, then Laggan-Tormore in the United Kingdom and Ofon Phase 2 in Nigeria in the second half of the year. Following an encouraging start for exploration at the beginning of the year, the Group is continuing its high-potential exploration program in Brazil, in the Kwanza basin of Angola, South Africa and Ivory Coast.

In the second quarter, production will be impacted by heavy seasonal maintenance activity, mainly in the UK, Norway and Thailand.

In the Downstream, the integrated Satorp refinery in Saudi Arabia is finalizing the start-up of its last units and should be fully operational in the coming months.

Refinery throughput in the second quarter will be affected by major turnarounds at Leuna and Vlissingen. Since the beginning of the second quarter 2014, European refining margins have recovered from the very low levels of the first quarter, and the refining and petrochemicals environment has remained favorable in the United States.

This press release presents the first quarter 2014 results from the consolidated financial statements of TOTAL S.A. as of March 31, 2014. The notes to these consolidated financial statements (unaudited) are available on the TOTAL web site (www.total.com).

This document may contain forward-looking information on the Group (including objectives and trends), as well as forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, notably with respect to the financial condition, results of operations, business, strategy and plans of TOTAL. These data do not represent forecasts within the meaning of European Regulation No. 809/2004.

Such forward-looking information and statements included in this document are based on a number of economic data and assumptions made in a given economic, competitive and regulatory environment. They may prove to be inaccurate in the future, and are subject to a number of risk factors that could lead to a significant difference between actual results and those anticipated, including currency fluctuations, the price of petroleum products, the ability to realize cost reductions and operating efficiencies without unduly disrupting business operations, environmental regulatory considerations and general economic and business conditions. Certain financial information is based on estimates particularly in the assessment of the recoverable value of assets and potential impairments of assets relating thereto.

Neither TOTAL nor any of its subsidiaries assumes any obligation to update publicly any forward-looking information or statement, objectives or trends contained in this document whether as a result of new information, future events or otherwise. Further information on factors, risks and uncertainties that could affect the Company's financial results or the Group's activities is provided in the most recent Registration Document filed by the Company with the French Autorité des Marchés Financiers and annual report on Form 20-F filed with the United States Securities and Exchange Commission ("SEC").

Financial information by business segment is reported in accordance with the internal reporting system and shows internal segment information that is used to manage and measure the performance of TOTAL. Performance indicators excluding the adjustment items, such as adjusted operating income, adjusted net operating income, and adjusted net income are meant to facilitate the analysis of the financial performance and the comparison of income between periods. These adjustment items include:

(i) Special items

Due to their unusual nature or particular significance, certain transactions qualified as "special items" are excluded from the business segment figures. In general, special items relate to transactions that are significant, infrequent or unusual. However, in certain instances, transactions such as restructuring costs or asset disposals, which are not considered to be representative of the normal course of business, may be qualified as special items although they may have occurred within prior years or are likely to occur again within the coming years.

(ii) Inventory valuation effect

The adjusted results of the Refining & Chemicals and Marketing & Services segments are presented according to the replacement cost method. This method is used to assess the segments' performance and facilitate the comparability of the segments' performance with those of its competitors.

In the replacement cost method, which approximates the LIFO (Last-In, First-Out) method, the variation of inventory values in the statement of income is, depending on the nature of the inventory, determined using either the month-end price differentials between one period and another or the average prices of the period rather than the historical value. The inventory valuation effect is the difference between the results according to the FIFO (First-In, First-Out) and the replacement cost.

(iii) Effect of changes in fair value

The effect of changes in fair value presented as an adjustment item reflects for some transactions differences between internal measures of performance used by TOTAL's management and the accounting for these transactions under IFRS.

IFRS requires that trading inventories be recorded at their fair value using period-end spot prices. In order to best reflect the management of economic exposure through derivative transactions, internal indicators used to measure performance include valuations of trading inventories based on forward prices.

Furthermore, TOTAL, in its trading activities, enters into storage contracts, which future effects are recorded at fair value in Group's internal economic performance. IFRS precludes recognition of this fair value effect.

The adjusted results (adjusted operating income, adjusted net operating income, adjusted net income) are defined as replacement cost results, adjusted for special items, excluding the effect of changes in fair value.

Euro amounts presented herein represent dollar amounts converted at the average euro-dollar exchange rate for the applicable period and are not the result of financial statements prepared in euros.

Dollar	1.30 \$/€	+0.1 \$ per €	-0.7 B\$	-0.3 B\$
Brent	100 \$/b	+1 \$/b	+0.30 B\$	+0.15 B\$
European refining margin index (ERMI)	30 \$/t	+1 \$/t	+0.08 B\$	+0.05 B\$

*Sensitivities are revised once per year upon publication of the previous year's fourth quarter results. Following the change to dollar-denominated reporting, effective January 1, 2014, the €-\$ sensitivity has been changed. The impact of the €-\$ sensitivity on operating income and on net operating income is 60% and 80% attributable to the Refining-Chemicals segment, respectively.

Sensitivities are estimates based on assumptions about the Group's portfolio in 2014. Actual results could vary significantly from estimates based on the application of these sensitivities.

* European Refining Margin Indicator (ERMI) is an indicator intended to represent the margin after variable costs for a hypothetical complex refinery located around Rotterdam in Northern Europe that processes a mix of crude oil and other inputs commonly supplied to this region to produce and market the main refined products at prevailing prices in this region. The indicator margin may not be representative of the actual margins achieved by Total in any period because of Total's particular refinery configurations, product mix effects or other company-specific operating conditions.

** 1 \$/t = 0.136 \$/b

*** consolidated subsidiaries, excluding fixed margin contracts, including hydrocarbon production overlifting / underlifting position valued at market price.

Note: The impact of a 0.1 \$/€ increase in the \$/€ exchange rate, from a base scenario of 1.30 \$/€, is estimated at -0.7 B\$ on adjusted operating income and -0.3 B\$ on adjusted net operating income.
