

## ***Production resumes at the CTBR-1 power station on Reunion Island***

The repair works on the electrical room damaged by the event which occurred on August 30th 2009, have enabled the restarting of the first unit of the CTBR-1 power station on September 24th 2009 at 9.15pm (local time) and of the second part on September 28th 2009 at 1.40am (local time).

The third unit, CTBR-2, with a capacity of 46 MW, has not been affected at all and is operating under normal conditions.
