Press release – production machine order

Bezons, France, May 25, 2010; 18.00 pm

---

## A new Multi-Wafer MBE6000 production machine order

*Bezons, France, 25 May 2010 – 18:00 pm – RIBER, the global leader for molecular beam epitaxy reactor (MBE), announces the sale of a MBE6000 Multi wafer MBE production machine*

Benefiting from a very high performance level reputation, the MBE6000 production system is capable to grow more than 1500 x 6" wafer per month of RF communications devices. RIBER's MBE6000 system was selected by a major III V devices manufacturer as MBE is optimized for the growth of HEMT structures and provides great added value when both performances and high up time are needed for the production of superior quality semiconductor heterostructures layers.

This new system will enable our customer to increase their production capacities by more than 1500 x 6' pHEMT structures a month with an up time of more than a year of continuous 7 days x 24 hours operations before maintenance.

This new sale confirms the sound quality of RIBER's order backlog at this date, which totaled € 11.7 million, a 92% increase compared to the same period of 2009.

### **About RIBER:**

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semi-conductor industry. This high-technology equipment is essential for the manufacture of compound semi-conductor materials and new materials that are used in numerous consumer applications such as new Information Technologies, OLED flat screens and the new generation of solar cells (CIGS).

Riber SA's shares are listed in Compartment "C" of the Euronext Paris Stock Exchange and are a component of the CAC IT index.

ISIN Code: FR0000075954

Reuters Code: RIBE.PA

Bloomberg Code: RIB.FP

Riber has been awarded the OSEO innovation certification, enabling it to qualify for FCPIs (French high-tech mutual funds).
