## Market outlook for second-half 2010

The second half of the year should see a divergence in trends between Europe and the rest of the world. In Europe, the market is expected to continue the fall that began in April with the end of the scrappage bonuses and the reinforcement of austerity plans in several countries. Countries outside Europe are expected to continue growing, the main reason being more favourable economic fundamentals.

The Group expects the global market to expand by around 8\% in 2010 compared with 2009, despite a fall in the European market that is estimated at between $7 \%$ and $9 \%$ on last year.

Jerome Stoll, Executive Vice-President of Sales and Marketing and Light Commercial Vehicles, commented: "Our objective for 2010 is to continue building market share for all our brands in all Renault Group regions. In Europe, we will consolidate the market share that we have reclaimed with the Renault brand to confirm our No. 3 position in PC sales, and the leadership of the Renault brand in LCV sales. Outside Europe, we will continue our offensive by stepping up our presence in emerging countries, which will drive growth in the years to come."
