

2010 9-month sales: up 11.7%

Consolidated sales (€ millions)	2010	2009	% change
1 st quarter	41.4	45.1	(8.4%)
2 nd quarter	47.0	40.8	+15.0%
3 rd quarter	48.7	37.0	+31,7%
Total	137.1	122.8	+11.7%

Improved economic climate in 3rd quarter 2010

Sales for the third quarter 2010 totalled € 48.7 million, an increase of 31.7% based on reported data compared to the third quarter 2009, which was the weakest quarter of 2009. Growth was 25% on constant foreign exchange.

This level of sales, which amounted to sequential growth of 3.4% compared to the second quarter 2010, was driven in particular by an improved global economic environment for the Connector industry, as well as Radiall's resilience in its markets.

Sales for the first nine months of 2010 amounted to € 137.1 million, an increase of 11.7% based on actual foreign exchange rates compared to 2009 and 9.2% on constant foreign exchange.

All Group divisions reported growth during the quarter. Civilian Aeronautics continued to grow and its sales order book remained strong, The Industry and Automotive sectors also experienced significant growth over the period, whereas the Military division proved the least buoyant.

2010 Outlook

Despite a highly unfavourable recent movement in the €/USD exchange rate and a continuing uncertain economic environment, the renewed growth noted since the second quarter allows Radiall to confirm its guidance for full-year sales well in excess of the level achieved in 2009, and to target improved profit from recurring operations for the second half of 2010 compared to that of the first half.

Shareholders' agenda: 2010 annual sales: **January, 14th 2011.**

About RADIALL

RADIALL designs, develops and manufactures electronic components dedicated to wireless communication, automotive telematics and military and aeronautic equipment applications.
