## **RIBER further strengthens its positions in India with a new MBE research system order**

***Bezons, December 16th, 2010 – 5:45 pm – RIBER, the global leader for molecular beam epitaxy (MBE), is announcing the sale of a Compact21 research system to a leading research institute based in India.***

The Compact 21 is the world's top-selling MBE research system. It will enable the customer's laboratory to ramp up its research capacities for the growth of new ultra-thin film electronic structures.

The system has been selected for its flexibility and adaptability, allowing it to be tailored for research on the most complex structures. The extensive portfolio of RIBER components also contributed towards the customer's decision to acquire all of RIBER's technology.

In addition to once again highlighting the commercial success of the Compact 21 range, this order confirms the strong development of RIBER's sales in India, where the semiconductor industry is growing fast.

### **About RIBER:**

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-technology equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, such as new information technologies, OLED flat screens and new generation solar cells.

Riber is listed on Euronext Paris Compartment "C" and is part of the CAC IT index.

ISIN: FR0000075954 Reuters code: RIBE.PA Bloomberg code: RIB: FP

Riber has been innovation certified by OSEO, the dedicated French innovation agency, enabling it to qualify for French innovation mutual funds (FCPI).
