

Sales in first half of 2011: up 17 %

(€ millions) – IFRS – at 30 June	2011	2010	% change
1 st quarter	50.2	41.4	+21.5%

Continued growth in 2nd quarter of 2011:

During the 2nd quarter of 2011, Radiall recorded sales of € 53.2 million, an increase of 13.0 % in reported data and 19.2 % at constant foreign exchange compared to the 2nd quarter of 2010.

During the 1st half of 2011 overall, sales grew by 17.0 % to € 103.4 million. At constant foreign exchange, sales growth for the half-year was 19.7 %, due to unfavourable foreign exchange movements in the 2nd quarter.

All of the Group's markets and regions contributed to sales growth in the first half. International sales represented 77.4 % of total business activity.

Following three consecutive months of sequential growth, the Group confirms a favourable business trend and continues to rely on diversified flagship markets to expand despite the uncertain economic climate.

Outlook:

Radiall begins the 2nd half of the year being on track, and targets a sales increase by 10 % for 2011. Sustained growth in 1st half of 2011 is expected to slack in the 2nd half of the year due to unfavourable comparison with 2nd half of 2010. This upbeat outlook remains subject to a continuation of the current overall business environment and to possible further unfavourable movements in the Euro/USD exchange rate and in raw material prices, which had an adverse impact on the 1st half of the year.
