

Revenues First Quarter Fiscal Year 2011/2012 + 28% Growth

ST. CLOUD, France and Vienna, VA, October 20th, 2011 - Systar (ISIN: FR0000052854 - SAR), a leading provider of performance management software, today announced its revenues for the first quarter of fiscal year 2011/2012, ending September 30th, 2011.

First Quarter Revenues (In Millions of Euros)	2011/12	2010/11	Var.
Consolidated Revenues	4,3	3,4	+ 28%

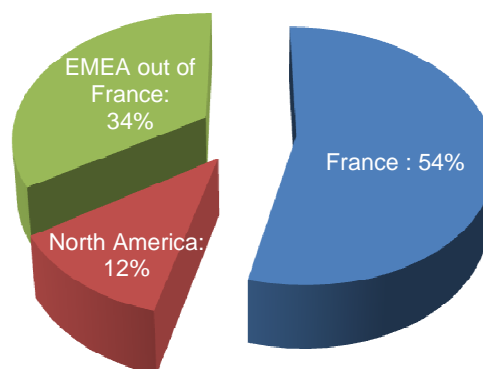

IFRS standards

Revenues grew 28% during the first quarter of fiscal year 2011/2012 compared to the same period of the previous fiscal year. Revenues grew 33% in France and 51% in EMEA out of France while decreasing 21% in North America due to an unfavorable exchange rate (-13% at constant exchange rate). The first quarter is traditionally less representative as it corresponds to the reduced activity of the summer months.

Budget constraints continue to weigh on the customers' purchasing decisions and the dates of contracts' closings remain uncertain, as during the previous quarters.

However, customers increasingly see the need to improve their control over their internal business processes and to overcome the growing complexities created by the virtualization of their infrastructures and by Cloud Computing, thereby contributing to the adoption of Systar software. This trend is not impaired by the current economic context and the business pipeline should continue to grow, fueled by the new offerings that will be launched throughout the fiscal year.

Geographical Distribution of Revenues

Revenues and results for the first half of fiscal year 2011/2012 will be released on February 14th, 2012

About Systar

Over 180 clients worldwide, including 10 of the world's 15 largest banks, rely on Systar's performance management software to transform their business and IT operations from reactive to proactive, solving problems prior to impacting the business.
