Outlook

Strong 2011 sales data validated the relevance of Radiall's strategy in its markets. The Group anticipates that 2011 current operating profitability will be close to the level reported in first half 2011.

Radiall is starting 2012 with a positive trend for its order book, despite the uncertain business environment, which calls for caution in relation to sales forecasts.

Shareholders' agenda: 2011 Annual Results: April, 20th 2012.
