Press release – OLED effusion cell order in Asia

OLED effusion cell order in Asia

Bezons, July 2nd, 2012 – 7:00 am – RIBER is announcing order for OLED effusion cells, designed for manufacturing OLED screens, by an existing customer in Asia. The order was completed in the end of June.

This order involves supplying equipments dedicated to manufacturing OLED (Organic Light-Emitting Diode) structures on smartphone screens. It is a continuation of previous orders booked in 2010 and 2011. It corresponds to an additional order of several tens of cells to be delivered before the end of 2012 in order to support the growth of customers' production line.

For reference, the OLED technology is based on the organic properties of certain molecules which emit light when submitted to an electrical current. Environmentally friendly, OLED screens consume less power than LCD screens, offer wider angle visibility and deliver much brighter and contrasting images. First used for developing small screens (mobile phones, radios, notebooks, etc.), the OLED technology is gradually diversifying with the manufacturing of flexible large screens and lighting (light sheets).

This order strengthens RIBER's market position in a strongly growing sector. It confirms the relevance of solutions developed for manufacturing of OLED displays, which will be reinforced by the ongoing development of a new generation of cell line for the next investments waves.

About RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-technology equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, such as new information technologies, OLED flat screens and new generation solar cells.

Riber is listed on Euronext Paris Compartment "C" and is part of the CAC Small, CAC Mid & Small and CAC IT indexes.

ISIN: FR0000075954 Reuters code: RIBE.PA Bloomberg code: RIB: FP

Riber has been innovation certified by OSEO, the dedicated French innovation agency, enabling it to qualify for French innovation mutual funds (FCPI).
