NEW HEALTH DATA HOST APPROVAL FOR PHARMAGEST INTERACTIVE

The PHARMAGEST Group, the French leader in pharmacy information technology, today announces that it has received a second approval from the Ministry of Work, Employment and Health, as the Host of Health Data of a personal nature (HDS).

On 8 August, PHARMAGEST INTERACTIVE was once again approved as Host of Health Data of a personal nature by the Minister for Health. This new approval regards a new service for hosting applications managed and administered by the client and containing health data of a personal nature collected in the context of telemedicine activities and called "Service TELE100T".

A NEW SERVICE FOR ALL ACTORS IN THE HEALTH FIELD: TELE100T

In addition, with this new approval, the PHARMAGEST Group offers a service for hosting health data of a personal nature via its infrastructure platform DATA100T, called "TELE100T".

This infrastructure is intended for hosting health data and applications that are managed and administered directly by its clients: health establishments, health professionals, health cooperation groups (GCS), software publishers, care associations and networks and health industries (pharmaceutical laboratories and manufacturers of medical devices).

A HIGHLY SECURE INFRASTRUCTURE

The PHARMAGEST Group has at its disposal the infrastructure required to implement and carry out the hosting of software and health data of its clients and obviously for its own services.

The PHARMAGEST Group operates its own host infrastructure called DATA100T, the main features of which can be summed up as follows: two buildings in Grand Nancy, an air-conditioned and protected IT room in each building, a so-called primary room and a so-called secondary room, 30 km of black optical fibre connecting the two buildings, a recovery plan between the two sites, completely redundant equipment ...

Furthermore, the architecture used by the PHARMAGEST Group in this secure data Centre meets the strictest protection standards regarding physical, electrical, environmental control, and air-conditioning security as well as safety against fire and flood.

A DEDICATED ORGANISATION

The PHARMAGEST Group's hosting activity is managed by an HDS Pole which carries out the support and operation of DATA100T.

This pole is attached to the Deputy Technical Internal IT and Network Management Team and is equipped with a large number of highly qualified human resources (ITIL certifications, Safety, Storage).

ABOUT THE PHARMAGEST GROUP

The PHARMAGEST Group is the French leader in pharmacy information technology, with 43.5% of market share, 9,800 clients and more than 750 staff. Since September 2007, the PHARMAGEST Group has also been enjoying a presence in Northern Europe with 12% market share in Belgium and Luxembourg through its subsidiary SABCO.

The favoured partner of pharmacists for nearly 30 years, the PHARMAGEST Group creates innovative information technology solutions for pharmacies, and develops E-Business E-Media activity with great potential for laboratories.

The PHARMAGEST Group is also developing new software solutions for care homes (EHPAD and day centres for the elderly), through its subsidiary MALTA INFORMATIQUE.

The first Logiciel de Gestion à Portail Intégré (Integrated Portal Management Software - LGPI Global Services®), creator of values for the patient, pharmacist and laboratory, dynamizes sales, optimizes purchases and enriches advice to the patient. It is also the first permanent impact medium for pharmacies, supplying laboratories with direct communication towards the pharmacist and his patients.

At the heart of the digital revolution that is gradually establishing itself in the daily life of health professionals and patients alike, at the beginning of 2012, the PHARMAGEST Group created an e-Health business, bringing together the subsidiaries DIATELIC (telemedicine and e-health solutions) and DOMEDIC EUROPE (intelligent pill dispenser DO-Pill Secure™).
