## Two III-V MBE reactors order for Vienna University of Technology

**Bezons, France, December 21<sup>st</sup> – 5:45 pm – RIBER, the global leader for molecular beam epitaxy (MBE), announces the sale of two Compact 21 MBE machines to Vienna University of Technology, a leading material research laboratory in Europe.**

The Compact 21 - 3 " wafer systems are designed for the research on compound semi-conductors for microelectronics or optoelectronics. MBE growth technology was selected as this platform is perfectly optimized when top performances of complex semiconductor heterostructures are needed.

These two new systems will enable Vienna University of Technology to increase his research capacities on new III-V and metal based structures. To extent the research capabilities and to grow "incompatible" material structures, the two MBE systems are connected together to maintain a full UHV environment all along the MBE processes.

### **About RIBER:**

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-technology equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, such as new information technologies, OLED flat screens and new generation solar cells.

Riber recorded €29 million in revenues in 2011 and employs 105 people.

Riber is listed on NYSE-Euronext Paris, Compartment "C", and is part of the CAC Small, CAC Mid & Small, CAC Technology and CAC T. HARD. & EQ indices.

ISIN: FR0000075954 Reuters code: RIBE.PA Bloomberg code: RIB: FP

In 2012, Riber is one of the best-rated companies in the Gaïa-index, the leading SRI index for French mid-caps.

Riber has been innovation certified by OSEO, the dedicated French innovation agency, enabling it to qualify for French innovation mutual funds (FCPI).
