## Press release – Order in China

Bezons, October 21<sup>st</sup>, 2013; 5:45 pm

---

### Order for a research & development system in China

*Bezons, October 21<sup>st</sup>, 2013 5:45 pm – RIBER, the global leader in molecular beam epitaxy (MBE), is announcing the sale of a 4" wafer capacity R&D MBE system to a leading material research institute in China.*

This laboratory is a long-standing customer of RIBER and this repeat order consolidates an already mutually successful relationship.

The new system will enable the laboratory to increase its fundamental research capabilities on cutting edge epitaxial layer / substrate combinations.

This order strengthens RIBER's key position in the Chinese market which is one of the fastest-growing regions in the global semi-conductor industry.

#### **About RIBER:**

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-technology equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, such as new information technologies, OLED flat screens and new generation solar cells.

Riber recorded €27.4 million in revenues in 2012 and employs 111 people. The company is ISO9001 certified. Riber is listed on NYSE-Euronext Paris, Compartment "C", and is part of the CAC Small, CAC Mid & Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is one of the best-rated companies in the Gaia-index, the leading SRI index for French mid-caps.
