

RIBER

Press release

SALES OF TWO MBE 412 SYSTEMS IN ASIA

Bezons, April 15th, 2014 - 7 am - RIBER, the global leader for molecular beam epitaxy (MBE), has secured an order for two R&D systems in Asia.

The MBE systems will be installed during 2014 in a leading laboratory in Asia. Connected via an UHV fully automated central robot, both systems will be used for III-V material researches, especially for developing arsenide and antimonide structures.

The MBE 412 model is the world's top-selling research system for 100 mm wafers. It offers unrivalled flexibility for use enabling it to meet the most demanding expectations for fundamental high level research on new concepts in semiconductors major fields.

This new important order further strengthens RIBER's leading position within the most important research laboratories.

ABOUT RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-technology equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and new generation solar cells.

The Riber Group recorded €23.5 million in revenues for 2013, with 109 employees at the end of 2013. The company is ISO9001 certified. Riber is listed on NYSE-Euronext Paris, Compartment "C", and is part of the CAC Small, CAC Mid & Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is one of the best-rated companies in the Gaïa-index, the leading SRI index for French mid-caps. Riber is eligible for SME share-based savings schemes.
