

McPhy Energy admitted to the CAC® Mid & Small index

The McPhy Energy share to be included in the CAC® Mid & Small, CAC® Small and CAC® All-Tradable indexes.

La Motte-Fanjas, September 9th, 2014 – McPhy Energy, specialized in hydrogen production and storage equipment for industry and energy markets, was selected by the CAC® Steering Committee (*Conseil Scientifique*) for inclusion in the CAC® Small, CAC® Mid & Small and CAC® All-Tradable indexes starting September 22th, on the opening of trading.

Inclusion in these three indexes of McPhy Energy, admitted to trading on Euronext Paris on March 25th, 2014, follows the quarterly review to ensure compliance with the index requirement for companies to have a free float adjusted annual velocity of at least 20%. Companies selected on that basis are then ranked by volume and free float market capitalisation.

"We are delighted that McPhy Energy has been included in the CAC® family of indexes. This selection confirms the liquidity of the share that has been listed on Euronext Paris for a period of less than six months. This will increase its attractiveness for French and international investors", concluded Pascal Mauberger, CEO and President of McPhy Energy.

About McPhy Energy

McPhy Energy, a leading developer of hydrogen-based solutions, was founded at La Motte-Fanjas in France in 2008. The company draws on its exclusive technique for storing hydrogen in solid form and its years of experience in producing hydrogen through water electrolysis to design and manufacture flexible production and storage equipment.

McPhy Energy markets easy-to-use, environmental-friendly solutions combining unique safety features and energy independence to over 1,000 clients in the renewable energy, mobility and industry sectors.

The group has three production sites in France, Germany and Italy and an R&D laboratory in France.

Since March 2014, McPhy Energy is listed on Euronext Paris (compartment C, ISIN code: FR0011742329; ticker: MCPHY).
