

Gemalto's Cinterion M2M technology leverages the Sprint network

Amsterdam, September 17, 2014 – Gemalto (Euronext NL0000400653 GTO), the world leader in digital security, announces a new initiative to enhance M2M connectivity across the United States with the certification of the Gemalto *Cinterion*® [PCS3 module](#) on the Sprint network. This new product is designed to provide superior efficiency in applications such as mHealth monitoring, fleet and asset tracking as well as smart home solutions.

The new *Cinterion*® PCS3 has been optimized for Sprint's M2M-enhanced *Band Class 10* network¹ bringing flexibility for universal and reliable coverage across the U.S. It increases overall efficiency by expanding the wireless range, providing better coverage for hospitals, clinics, in-home usage and remote device applications. In addition, it improves environmental sustainability through better energy efficiency.

"Collaborating with Gemalto is a key part of Sprint's Machine-to-machine strategy," said Mohamad Nasser, Director of Product, Platforms and Marketing for Sprint's Emerging Solutions Group. *"Sprint is committed to supporting the specific data needs of our M2M customers via reduced cost-barriers and increased operability. Gemalto's solution is uniquely compatible with Sprint's updated network providing superior in-building penetration and increased rural coverage, making it ideal for utility and security applications."*

"With 250 million devices projected to be in the field globally by the end of 2014², Gemalto's long-life product strategy helps ensure Sprint's M2M clients' investments are optimized," added Paul Kobos, Head of M2M Sales for Gemalto North America. *"Gemalto's solution brings a high performance power management system, extending the battery life up to 10 times for compact devices."*

¹ CDMA1X Advanced, SMR 800 MHz spectrum.
