We note:

- 1) In the Electronics division, a strong growth, higher than initially expected and generated, in particular, by the automotive sector in Poland, despite the decrease in Germany (-10,9%) and in the R&D Centers (-20%).
- 2) In the Telemetry division, a growth both in France (+15%) and in Exports (+30%), with an increase by 35 and 60% in Spanish and Italian subsidiaries.
- 3) In the Traffic Signs division, a 4,5% revenue decrease, excluding the Ecotaxes contract, in a context which is still very difficult, with lower volume and price pressure .

All these elements confirm the ability of the Group to generate growth, both in terms of revenue and results, in a difficult and uncertain environment.
