Press release

Two new orders for research systems

Bezons, December 26th, 2014 - 7 am - RIBER, the global leader for molecular beam epitaxy (MBE), is announcing that it has signed two orders for research machines.

System ordered in Russia

RIBER has sold a Compact 21 research system to the Saint Petersburg Academy of Sciences. The machine, which production has been anticipated by Riber, will be delivered in 2014 to the MBE Center of Excellence, led by Pr Zhores Alferov, Academician and Nobel Prize Laureate in Physics.

RIBER is a longstanding partner of this research center, which is working to promote MBE technology and train users from various laboratories around the world. More specifically, the system sold will make it possible to further strengthen its development capabilities for designing semiconductor oxides.

System ordered in Asia

RIBER has also recently sold a Compact 21 system to a major Asian laboratory. This order is scheduled to be delivered during the first quarter of 2015.

ABOUT RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and new generation solar cells.

The Riber Group recorded €23.5 million in revenues for 2013, with 109 employees at the end of 2013. The company is ISO9001 certified. Riber is listed on NYSE-Euronext Paris, Compartment "C", and is part of the CAC Small, CAC Mid & Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is one of the best-rated companies in the Gaïa-index, the leading SRI index for French mid-caps. Riber is eligible for SME share-based savings schemes.
