

ALBIOMA

PRESS RELEASE

PARIS LA DÉFENSE, 9 MARCH 2015

STRIKE ENDS AT LE MOULE SITE IN GUADELOUPE

Albioma has announced that it has signed an agreement with the FE-CGTG trade union confederation to end the strike started on 21 January this year by some of the workforce at the Le Moule power plants in Guadeloupe. The return to work became effective on 5 March. Power generation at the two plants had been ensured by non-striking employees since 14 February.

Next on the agenda: turnover for the first quarter of the 2015 financial year, on 29 April 2015 before trading hours.

ABOUT ALBIOMA

Albioma is an independent energy producer and world leader in the conversion of biomass into a highly-effective source of energy, in collaboration with its agri-business partners. For more than 20 years, Albioma has operated power plants recovering bagasse, a fibrous by-product of sugar cane, replaced by coal outside the sugar cane harvest. Its unique expertise has enabled Albioma to establish itself as an indispensable partner in the sugar and ethanol industry in the French overseas territories and Mauritius. Albioma is now developing power plants using only biomass, which recover, in addition to bagasse, green waste and wood industry residue. The Group also operates a highly-efficient photovoltaic installation and agricultural anaerobic digestion units. In 2014, the Group, which already had a presence in mainland France, the French overseas territories and Mauritius, began operating in Brazil, the world's leading sugar cane producer.
