

PRESS RELEASE

PARIS LA DÉFENSE, 29 JUNE 2015

IMPLEMENTATION OF THE LIQUIDITY CONTRACT ENTRUSTED TO ROTHSCHILD & CIE BANQUE

Albioma announces that the implementation of its liquidity contract has been entrusted to Rothschild & Cie Banque instead of Exane BNP Paribas.

This liquidity contract is compliant with the AMAFI deontological charter approved by the French Financial Market Authority and has been entered into within the framework of the share buyback scheme approved by the General Meeting of shareholders of 28 May 2015, the description of which is available on the Company's website, www.albioma.com. It shall aim to foster regular and liquid trading in the Albioma shares (ISIN: FR0000060402, ticker: ABIO) on Euronext Paris.

This new contract shall come into force on 30 June 2015. Cash and shares that were on the liquidity account relating to the Exane BNP Paribas liquidity contract were transferred on the liquidity account relating to the Rothschild & Cie Banque liquidity contract, representing:

- 71,200 shares;
- 812,656.47 euros.

The Company shall add an additional contribution of 3,189,119.53 euros within the next few days; the total cash contribution made available to Rothschild & Cie Banque with a view to implement the liquidity contract will thus amount 4,001,776 euros.

Next on the agenda: results for the first half of the 2015 financial year on 27 July 2015 (after trading).

ABOUT ALBIOMA

Albioma is an independent energy producer and world leader in the conversion of biomass into a highly-effective source of energy, in collaboration with its agri-business partners. For more than 20 years, Albioma has operated power plants recovering bagasse, a fibrous by-product of sugar cane, replaced by coal outside the sugar cane harvest. Its unique expertise has enabled Albioma to establish itself as an indispensable partner in the sugar and ethanol industry in the French overseas territories and Mauritius. Albioma is now developing power plants using only biomass, which recover, in addition to bagasse, green waste and wood industry residue. The Group also operates a highly-efficient photovoltaic installation and agricultural anaerobic digestion units. In 2014, the Group, which already had a presence in mainland France, the French overseas territories and Mauritius, began operating in Brazil, the world's leading sugar cane producer.
