Double contract success for Eurovia to deliver highway maintenance services in the United Kingdom

- Wiltshire and Swindon road networks and lighting services' maintenance
- 4,400km of roads, 981 bridges, 3.9 million m² of footway and 38,000 street lights
- Two contracts for an initial period of 5 years with options to extend for 2 additional years with a value of at least €100 million (£76 million)

Ringway, a Eurovia subsidiary in the United Kingdom which is dedicated to Highway services and a leading Company in long-term highway maintenance services, has been announced as Preferred Bidder for the Wiltshire and Swindon Highway Services Contracts, 2 Councils in the Southwest of England.

This five-year mandate, with an option to renew for two years, represents a value of at least €100 million (£76 million).

Starting April 1, 2016, Ringway will ensure various highway maintenance services to a population of nearly 650,000 in Wiltshire and Swindon. For the Wiltshire Council, Ringway will provide a complete range of preventive maintenance and repair services. These services include emergency response, winter service, bridge repairs and maintenance, and street lighting services. The Contract will also see the reinstatement of 20 Parish Stewards who will provide dedicated reactive and routine services in the community. For the Swindon Council, Ringway will deliver a preventive maintenance programme and scheme, including surfacing of carriageways and footways.

After managing two contract terms from 1998 to 2012, Ringway is very pleased to have won back the trust of the Wiltshire and Swindon Councils, while transferring staff from the incumbent supplier.

Global maintenance and upkeep service for transport infrastructures is one of Eurovia's four business lines. Worldwide, Eurovia manages and maintains 70.000 km of road systems under long-term contracts.

About Eurovia

Eurovia, a subsidiary of VINCI, is a world leader in the construction of transport infrastructure and urban development. Eurovia builds transport infrastructure, including roads, highways, railways, and airport and tramway platforms, and contributes to industrial, commercial, and urban site development. In addition, the Company possesses extensive know-how in related areas: demolition and deconstruction, sanitation, excavation, roadwork and utility networks, signage, engineering structures, and noise-attenuation solutions. The Company also controls its supply chain through its industrial network, which produces aggregates and materials for roadway and railwork construction projects. Eurovia operates in 16 countries, employs 39,000 people, and achieved sales of €8.4 billion in 2014.
