

PRESS RELEASE

FAIVELEY TRANSPORT TO SUPPLY ACCESS DOORS AND BRAKING SYSTEMS FOR SYDNEY METRO NORTHWEST TRAINS

Faiveley Transport has been awarded contracts by Alstom to supply access doors and braking systems for the Metropolis metro trains which will run on the Sydney Metro Northwest.

A few months after being awarded the Platform Screen Doors contract, Faiveley Transport has strengthened its position as a key railway systems supplier in this Australian project.

Sydney Metro Northwest, previously known as North West Rail Link, is the new metro rail system that will link the north-western suburbs of Sydney. It is the first stage of Sydney Metro, Australia's largest public transport project. Sydney Metro Northwest will be the first fully-automated metro system in Australia, initially operating 22 six-car Alstom Metropolis trains.

The contracts awarded to Faiveley Transport are worth more than €10 million. They cover complete braking systems (brake control, air generation and treatment units, and bogie brakes) and access doors systems (external sliding type access doors).

Faiveley Transport will be in charge of the design, engineering, manufacturing and delivery of the railway systems, with three of the Group's sites worldwide involved - Hosur, India and Shanghai, China, with the support of Sydney, Australia. Delivery is scheduled to start in July 2016 and is due to be completed by mid-2018.

Simon Charlesworth, Faiveley Transport Sales & Marketing Vice President, said *"Just a few months after being awarded the Platform Screen Doors contract for Sydney Metro Northwest, we are pleased to have been selected for these new contracts. Faiveley Transport will be one of the major suppliers on this project, one of the largest rail investments to take place in Australia, which will significantly expand public transport in Sydney. This will allow us to develop our collaboration with Alstom while providing innovative railway solutions, and to reinforce our position as a leading railway supplier in the region."*

About Faiveley Transport Group:

Faiveley Transport is a global supplier of high added value integrated systems for the railway industry. With more than 5,700 employees in 24 countries, Faiveley Transport generated sales of € 1,048 million for the 2014/2015 financial year. The Group supplies manufacturers, operators and railway maintenance bodies worldwide with the most comprehensive range of systems in the market: Energy & Comfort (air conditioning, power collectors and converters, and passenger information), Access & Mobility (passenger access systems and platform doors), Brakes & Safety (braking systems and couplers) and Services.
