

Gemalto's Mobile Security solution achieves ANSSI CSPN Security Certification

- ANSSI's CSPN security certification highlights the strength of Gemalto's cost effective offering
- CSPN is a high security level for software applications required by experienced financial institutions

Amsterdam, April 14, 2016 - Gemalto (Euronext NL0000400653 GTO), the world leader in digital security, announces that its mobile security solution, [Ezio Mobile Software Development Kit \(SDK\)](#), has achieved security certification from the well-recognized [ANSSI](#) (Agence Nationale de la Sécurité des Systèmes d'Information) governmental agency for network and information security.

Ezio Mobile SDK acts as an extra layer of security and is a simple, comprehensive and cost effective mobile authentication tool to increase mobile financial applications security. It also enables banks to protect and secure their mobile banking and mobile payment services against malware and cyber-attacks through multi-factor authentication and advanced protection mechanisms.

The Mobile SDK easily integrates into any mobile financial application thus allowing mobile developers to quickly achieve a higher level of security without requiring any specific cryptographic or mobile threat knowledge. Through black-box testing, the CSPN certification helps ensure that *Ezio Mobile SDK* behaves as defined to this industry leading testing standard". CSPN is a high security level for software applications required by experienced financial institutions to operate mobile wallet payments.

"With the number of mobile banking users in 2018 expected to reach 1.8 billion, the shift to mobile banking is no longer a trend, it's a reality. Banks can ensure that they have the right protection in place to keep their customers' details and money safe and secure by deploying mobile Ezio security technology," commented Håkan Nordfjell, Senior Vice President of eBanking & eCommerce at Gemalto.

About Gemalto

Gemalto (Euronext NL0000400653 GTO) is the global leader in digital security, with 2015 annual revenues of €3.1 billion and customers in over 180 countries. We bring trust to an increasingly connected world.

Our technologies and services enable businesses and governments to authenticate identities and protect data so they stay safe and enable services in personal devices, connected objects, the cloud and in between.

Gemalto's solutions are at the heart of modern life, from payment to enterprise security and the internet of things. We authenticate people, transactions and objects, encrypt data and create value for software – enabling our clients to deliver secure digital services for billions of individuals and things.

Our 14,000+ employees operate out of 118 offices, 45 personalization and data centers, and 27 research and software development centers located in 52 countries.
