Further high comparison basis in 3rd quarter 2016/17

Bigben achieved a turnover of € 71.9 million, down by 3.4% for the 3rd quarter of FY 2016/2017 (October to December 2016). This trend, in line with announced forecast, results from a high comparison basis in both Publishing and Audio business segments, which already impacted the second quarter.

GAMING

- As previously announced, the Gaming business segment showed sales down to 24.8 M€ (- 4.1%) in the 3rd quarter of FY 2016/17 when compared to the 3rd quarter of FY 2015/16.
 - Publishing: Further to the 2nd quarter, activity in Publishing for the 3rd quarter of FY 2016/17 is to be compared with a very dynamic 3rd quarter of FY 2015/16, supported by the major success of the *WRC5* title compatible on « old » and « new generation » hardware. The distribution of the *WRC6* sequel, only compatible with new generation hardware, follows the development of the installed base. However the releases of *Handball 17* and *The Voice* games as well as the launch of *Sherlock Holmes*, *The Devil's Daughter* in both America and Asia allowed to soften the impact of this unfavourable comparison basis. Quarterly sales for this business segment amounted to 7.2 M€.
 - Accessories: Sales were up by 8.7% and reached 13.2 M€. This achievement was pulled by the first deliveries (30 000 units in December 2016) of the new *REVOLUTION Pro Controller* under *PlayStation@4* license by *SONY*, by the gradual increase in sales of *Plantronics* headsets and by the growing success of the *Nacon* branded PC accessories.
 - Distribution: Sales in this sideline business amounted to 4.4 M€ thanks to the distribution of the *Final Fantasy XV* game on behalf of Square Enix.

MOBILE

- The Mobile business achieved 32.0 M€ sales in the 3rd quarter of FY 2016/17 i.e. a virtually stable turnover (+0.5%) when compared to the same period of previous financial year. The further success in France and now abroad of *Force Glass™* protection screens and the growing sales of new connected devices such as the Bigben recreational drone offset the withdrawal of accessories dedicated to *Samsung Note 7*.

AUDIO

- The sales drop of Audio products to 15.1 M€, down by 9.7% when compared to an especially thriving market of sound towers in 2015, conceals the growing success of *Thomson* licensed products (+49.2%) and the resilience of Bigben innovative products faced with a strong competition.

Outlook

Strong sales growth expected in 4th quarter

Bigben anticipates a strong sales growth in the 4th quarter of FY 2016/17 supported by the Gaming activity.

The Accessories business segment will benefit from the growing sales of the *REVOLUTION Pro Controller* with over 100,000 units delivered before end of March 2017. This accessory of strategic importance for the Group enjoyed a strong interest from social networks and received particularly favourable reviews as well as excellent ratings from specialized websites ranging from 16/20 to 19/20.

Publishing sales should simultaneously be back to growth with the launch of two new gaming titles, *2Dark* and *Flat-Out* as well as with the international deployment of *WRC6* and repeat orders for *The Voice* game. Sales of this last title will be supported at the beginning of 2017 by a strong marketing of the video game by French major TV channel TF1 during the broadcasting of the new season of this TV game.

The Mobile business will be hallmarked by the further success of *Force Glass™* protection screens and by the development of accessories for the new releases of iPhone, Samsung and Huawei, while Audio should record stronger sales in *Thomson* products.

Banking on its pipeline of gaming titles which should generate over 50 M€ in Publishing for FY 2017/2018, on the market potential of the *REVOLUTION Pro Controller* as well as on its prudent currency hedging policy, the Bigben Group confirms the targets announced for its *Horizon 2018 Plan* as follows:

- 2016/2017: sales between 200 M€ and 210 M€ and a result from current operations over 5%,
- 2017/2018 an accelerated sales growth and a result from current operations over 7%.
