BIC UPDATES ITS FULL YEAR 2017 NET SALES OUTLOOK

Net Sales Organic Growth¹ is expected to be slightly below 2%, compared to between +3% and +4% communicated previously.

At this sales growth level, we expect 2017 Normalized Income from Operations margin decline to be less than 100 basis points.

The revised Full Year 2017 Net Sales Organic Growth outlook is due to:

- lower than expected performance in U.S. Lighters and Shavers for the balance of the year
 - Through mid-September 2017, the Lighter market grew slightly in value and our market share was stable. However, several major customers are reducing their inventory levels, affecting sell-in;
 - the Wet Shave market continues to be heavily disrupted. BIC market share has stabilized over the past 4 and 13 weeks² but this will not be sufficient to achieve initial objectives.
- stronger than expected softness in Latin America
 - this softness is mainly in Brazil where, due to a decrease in overall consumption, retailers are cutting inventories in all 3 categories.

Despite these challenging sales trends, the Group confirms its Normalized Income From Operations margin outlook of less than 100 basis points decline as a result of adjustments in Brand Support investments and Operating Expenses for the balance of the year.
