

## Order of a research MBE system in Japan

Bezons, December 5, 2017 - 5:45pm - RIBER, a global market leader for semiconductor industry equipment RIBER, is announcing the order of a research MBE system.

A Japanese university has ordered a research MBE system, model C21DZ, to make research on compounds semi-conductors microstructure.

The Compact 21DZ is one of the newest of the Compact 21 range, with over 125 systems already installed worldwide.

## **About RIBER:**

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes.
