VINCI CONSTRUCTION SELECTED TO BUILD **MAJOR NEW MOTORWAY CONNECTION IN NEW ZEALAND**

○○○ Create better ortano travel choices

for walkers, cyclists and users of public transport

Rueil-Malmaison, 21 February 2018

VINCI Construction selected to build major new motorway connection in Auckland, New Zealand

- Design-build of a major new motorway connection in New Zealand's economic capital, Auckland
- Project with a value of \$700 million New Zealand dollars (around €415 million)

VINCI Construction subsidiary HEB Construction, has been chosen as part of an alliance contract¹ to build the Northern Corridor Improvements Project (NCI Project). With a total value of \$700 million New-Zealand dollars (around €415 million), the contract aims at creating a new connection north of Auckland between the Northern Motorway (State Highway 1) and Upper Harbour Highway (State Highway 18), as well as extending the Northern Busway to Albany and add more than 7 kilometres of new walking and cycling paths.

The NCI Project Alliance comprises the New Zealand Transport Agency, HEB Construction, Fulton Hogan, Opus and Jacobs.

The project is an important link in helping to realize the full benefits of the Western Ring Route by giving users an alternative route to State Highway 1 and the Auckland Harbour Bridge. It will also create better travel choices for walkers, cyclists and users of public transport.

The Alliance is now tasked with finalising the detailed design and beginning construction early this year. The project will be undertaken in stages over the next four years. The first steps towards construction will include road resurfacing and the installation of moveable median barriers.

The Alliance has started recruiting for more than 150 new roles including surveyors, engineers, safety advisors, machine operators, drainlayers, carpenters and general construction field staff.

Since VINCI finalized the acquisition of HEB Construction in June 2015, the company worked in New-Zealand as a member of The North Canterbury Transport Infrastructure Recovery Alliance (NCTIR) on reconstruction following the earthquake that struck the Kaikoura region in November 2016. HEB Construction is also working on the Nga Puna Wai sports centre and on several marine works projects: Centreport container quay repair, Port Otago quay extension and Port of Lyttelton terminal construction.

This press release is an official information document of the VINCI Group.

¹ Alliance contracts are incentive-based relationship contracts in which the parties agree to work together as one integrated team. In an alliance contract, the owner, contractor and designer are all parties to one project agreement.

About VINCI Construction

VINCI Construction, a global player and European leader, is active on five continents, with more than 70,000 employees and 700 companies generating 2017 consolidated revenue of €14 billion. Structured according to an integrated model, the company has the capacity to intervene over the entire life cycle of a structure (finance, design, construction maintenance) in eight sectors: buildings functional structures transport infrastructure hydraulic construction, maintenance) in eight sectors: buildings, functional structures, transport infrastructure, hydraulic infrastructure, energy, the environment, oil & gas, and mines.

About VINCI

VINCI is a global player in concessions and contracting, employing close to 195,000 people in some 100 countries. We design, finance, build and operate infrastructure and facilities that help improve daily life and mobility for all. Because we believe in all-round performance, above and beyond economic and financial results, we are committed to operating in an environmentally and socially responsible manner. And because our projects are in the public interest, we consider that reaching out to all our stakeholders and engaging in dialogue with them is essential in the conduct of our business activities. VINCI's goal is to create long-term value for its customers, shareholders, employees, and partners and for society at large.
