

CGG Adds New Santos VIII Multi-Client Survey to its Unique Regional Broadband Coverage Offshore Brazil

Paris, France – March 15, 2018

CGG has commenced acquisition of a large broadband 3D multi-client survey in the pre-salt area of the deepwater Santos Basin. *Santos VIII* is the most recent survey in CGG’s vast ongoing pre-salt program that delivers ultramodern seismic data, enabling exploration companies to better evaluate pre-salt opportunities in advance of Brazil’s pre-salt licensing rounds.

Santos VIII covers an area of over 8,000 km² adjacent to the Peroba, Pau Brasil and Boumerangue fields. The resulting BroadSeis™ data will be imaged with CGG’s advanced full-waveform inversion (FWI) technology in its Rio de Janeiro Subsurface Imaging Center and merged with the *Constellation* reprocessing project to provide a regional broadband image of this prolific basin. Fast-track products will be available in the fourth quarter of 2018 and final products will be available in the second quarter of 2019.

Map showing CGG’s 3D data coverage in the pre-salt area offshore Brazil.

Constellation is a 44,000 km² project that upgrades CGG's existing *Cluster* and *Cluster Extension* surveys with its latest subsurface imaging technology, including 3D deghosting with bandwidth extension and TTI FWI velocity model building, to provide detailed broadband pre-salt images.

Jean-Georges Malcor, CEO, CGG, said: "The addition of *Santos VIII* will extend our world-class broadband data coverage in the highly prospective deepwater Santos Basin. It is the latest instalment of our contiguous volume of over 94,000 km² of seismic data and integrated geologic studies that bridge the Santos and Campos Basins to cover the entire pre-salt area. These multi-client data sets are an essential resource for oil and gas companies to complete a detailed picture of the complex Santos Basin in advance of Brazil's future licensing rounds."

About CGG

CGG (www.cgg.com) is a fully integrated Geoscience company providing leading geological, geophysical and reservoir capabilities to its broad base of customers primarily from the global oil and gas industry. Through its three complementary businesses of Equipment, Acquisition and Geology, Geophysics & Reservoir (GGR), CGG brings value across all aspects of natural resource exploration and exploitation. CGG employs more than 5,300 people around the world, all with a Passion for Geoscience and working together to deliver the best solutions to its customers.

CGG is listed on the Euronext Paris SA (ISIN: 0013181864) and the New York Stock Exchange (in the form of American Depositary Shares. NYSE: CGG).
