## Order for a research MBE system in Europe

**Bezons, December 20, 2018 - 8:00am - RIBER, a global market leader for semiconductor industry equipment, is announcing an order for a research MBE system in Europe.**

The Autonomous University of Madrid has ordered a research MBE system, Model Compact 21T. This system will contribute to further strengthen its research capabilities to develop new electronic devices based on III-V materials on Silicon substrate.

This order reflects the commercial success of the Compact 21 range, the world's best-selling research MBE system.

It will be delivered in 2019.

### **About RIBER:**

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes.
